

Toyota HVAC class

Instructor Marty Stratton

*Doors Open 6:30pm * RSVP Today * Bring a Friend*

Wed, April 14th, 2010 * 7 –10 pm Seminar

At: AAA 5700 Brecksville Rd Independence OH

Toyota as well as many other Asian manufacturers have re-designed their HVAC systems in order to offer better efficiency while reducing the weight of the vehicle. This class will cover most of the new HVAC technology used on today's Toyota vehicles as well as many other Asian manufacturers.

Topics that will be covered will include:

- New Clutch less design Compressors
- New super efficient condensers
- Does Toyota recommend using dye in their HVAC systems?
- Newer HVAC control devices being used by Toyota and other Asian manufacturers
- Toyota Hybrid HVAC systems
- New solar panel powered HVAC blower motor used on the 2010 Prius model
- Diagnostic procedures recommended by Toyota and other Asian Manufacturers

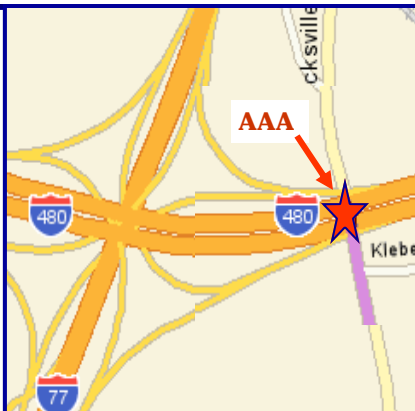

This class will contain a lot of newer updated material which is needed for today's serious HVAC technician.
